

# COMMUNITY CONVERSATION

**Thursday, June 17 | 5:30-7:30 PM**

Conversations on rural Minnesota healthcare needs

Join other Minnesotans from rural communities to discuss needs around health resources, current gaps, and desired supports. This conversation is specific to those living in rural communities throughout Northern Minnesota.

Together we explore compelling questions and build a collective knowledge to benefit those living with epilepsy and their family. This conversation is for all rural community members, whether impacted by epilepsy or not. This includes people with epilepsy, family members, caregivers, health care providers, and those interested in community health and wellness.
